

Ticket No: 18

Summary Implement group-based administrative role assignment for remote support staff

Description

Requesting transition from direct Microsoft Entra administrative role assignments to group-based role management for remote support personnel.

Requested tasks:

- Assign Helpdesk Administrator role to RemoteSupport_Technicians security group
 - Assign User Administrator role to RemoteSupport_Technicians security group
 - Verify inherited administrative permissions through group membership
 - Validate continued administrative functionality for support personnel
 - Reduce reliance on direct individual administrative role assignments

created the ticket.

Help Desk 41m ago

Beginning group-based assignment process for help desk technicians. In progress.

Help Desk 35m ago

"Add assignments" disabled. Insufficient permissions. Escalating and assigning to admin.

Help Desk 35m ago

changed assignee from **Help Desk** → **Jay Bay**.

Jay Bay 35m ago

Continuing group based assignment. In progress...

Jay Bay 28m ago

Created a new role assignable group. Adding assignments.

Jay Bay 23m ago

Added assignments to both Help Desk and User. Removed direct assignments. Waiting for helpdesk to verify permissions remain the same. Waiting and reassigning to helpdesk.

Jay Bay 23m ago

changed assignee from **Jay Bay** → **Help Desk**.

Help Desk 22m ago

Verifying my permissions remain the same.

Help Desk 19m ago

My permissions remain the same.

Jay Bay 18m ago

Successfully implemented group-based administrative role assignment within Microsoft Entra ID using a role-assignable security group. Assigned Helpdesk Administrator and User Administrator roles to the RemoteSupport_Admns group and verified inherited administrative permissions through group membership. Confirmed continued help desk administrative functionality following transition from direct user-based role assignments to centralized RBAC management.
